- Senior Developer at Keywordchi and theyask, actively involved in this project from beginig, developed using c# on the .NET Core 3.1 platform.

PROJECTS

keywordchi (01/2022 - Present)

KeywordChi is a tool or service that helps users find suitable keywords for their content. It is typically used by SEO specialists (Search Engine Optimization) and content creators to increase website traffic and improve rankings in search engine results. Some features and benefits of Keyword Chi may include:

- **Keyword Research:** KeywordChi helps users identify relevant and high-search keywords.
- **Competitor Analysis:** The tool can show users which keywords their competitors are using and how they are ranking.
- **Content Suggestions:** KeywordChi might offer recommendations to improve website content based on keywords.
- If the KeywordChi you are referring to is a specific tool or service with unique features or applications, please provide more details so I can give more accurate inf
